A Study Center of

# FINAL CUT STUDIO MASTER

Duration: 3 Months

Final Cut Studio is a standard tools for professional audio, video, and compositing throughout the world. The boundless capabilities of FCS have no parallel in the editing world. Nearly every major motion picture and prime-time TV show is using this program. ADMEC's FCS Master Program encompasses technical skills, aesthetics and workflow knowledge. This program is capable to move students from having no knowledge to advanced industry-level expertise in a very short span of time.

Becoming a skilled Final Cut Studio Master is a challenge. All-around skills are highly respected in the entertainment industry. That's why we have developed the Film & Video Editing Program. ADMEC's FCS Master Program is a faster and more job-centric alternative. This course is taught with latest industry trends, enabling the students not only to develop deeper knowledge on multiple aspects of after effects but also get good practical training. Also we work to help our students in their portfolio and resume development, which enables them to fetch good job opportunities in future.

Prerequisites to join this Course: Knowledge of Photoshop or Illustrator or/and Windows or Mac OS. Prior knowledge of editing terminology would be an added advantage.
